- High Cholesterol
- Arthritis
- Obesity
- Cancer
- Depression
- Digestive Problems
- Osteoporosis
- High Medical/ Medication Costs

Prevent & Reverse Disease
With a Fork & Knife

**Coronary Health
Improvement Project**

♥ What is CHIP?

The **C**oronary **H**ealth **I**mprovement **P**roject, (**CHIP**), is a lifestyle program that is designed to substantially lower high levels of blood pressure, blood sugar, cholesterol, heartburn, angina, and to lessen depression. It facilitates the reversal of narrowed arteries. If you wish to improve or avoid these problems, CHIP is for you.

This world-class program is conducted in hospitals, corporations and churches throughout North America, in Australia, New Zealand, England and beyond. Over fifty thousand have been helped. You can be one of them because CHIP is now available in your community.

Hans Diehl,
Dr. Health Sc, MPH
Clin. Prof. Preventive Medicine
Loma Linda University
Director, Lifestyle Medicine
Institute

“Dr. Hans Diehl is the speaker in this dynamic, scientifically sound, and often humorous video lecture series. His pioneering work in lifestyle medicine includes directing research & education programs in the early days of the Pritikin Longevity Center in California. CHIP results have been reported in more than a dozen articles published in peer-reviewed journals, such as:

The American Journal of Cardiology

Journal of the American Dietetic Association

Preventive Medicine

Journal of Occupational & Environmental Med.

The **New York Academy of Medicine** published (Sept. 2009) a compendium report, where the **CHIP** Disease Prevention Program was **rated as one of the top three** (out of 84) national community based health programs. An analysis of the Rockford, Illinois CHIP showed highly significant reductions in disease progression with the greatest improvements among those at highest risk, after **just 30 days**. The estimated Return On Investment within one year was estimated to be \$5.60 for every dollar invested.

♥ Your CHIP program includes

- ✓ **2 Health Screens including: weight, cholesterol, LDL, HDL, triglycerides glucose, blood pressure, pulse etc.**
- ✓ **2 Clinical Lifestyle Evaluations & Personalized Counseling**
- ✓ **16 Health & Lifestyle lectures**
- ✓ **Dynamic Living Text & Workbook**
- ✓ **Natural Foods Cookbook**
- ✓ **Food Demonstrations & Samples**
- ✓ **Monthly Alumni Support Meetings**

♥ What CHIP can do for you!

- ✓ **Cholesterol levels drop an average of 10-20% and as much as 40%**
- ✓ **Weight loss averages 7 pounds in just 30 days**
- ✓ **Diabetes and Blood Pressure medications are often reduced or sometimes eliminated**
- ✓ **Depression recovery is high**
- ✓ **Better sleep and higher energy levels are commonly reported**

“Dr. Hans Diehl has brought a very powerful message... how to use diet and exercise to prevent the number one killers in our society.”

*William Castelli, MD, MIH
Director Framingham Heart Study
National Institutes of Health*
